# FACE THE LIGHT

THE FACIAL OF THE FUTURE IS HERE. OMNILUX REVIVE LIGHT THERAPY TREATMENTS HAVE ALREADY WORKED WONDERS FOR THE SKIN OF HUNDREDS OF SWITCHED-ON AUSTRALIANS.

#### WHAT IS OMNILUX REVIVE?

It is a painless, non-surgical, non-laser light therapy that complements the skin's natural moisture renewal process, deeply hydrating and plumping the skin. Think of it as a photo-facial that treats the skin similarly to how photosynthesis works in plants.

#### WHAT CAN IT DO FOR MY SKIN?

Omnilux Revive treatments can help minimise the visible signs of ageing of the skin and improve the appearance of sun-damaged skin. Most clients enjoy beautiful results after the first treatment and their skin immediately looks clearer, brighter and smoother. The length of your course of treatments and your skin type and texture will determine the overall results. Omnilux Revive can be used alone or to enhance a variety of skincare products and cosmetic procedures.

#### HOW DOES IT WORK?

As you lie under the Omnilux Revive your face is surrounded by thousands of light emitting diodes (LEDs) that radiate pure red light. A session feels warm and relaxing, like lying in the sun for 20 minutes without the UVA, UVB or infra-red radiation.

#### HOW MANY TREATMENTS WILL I NEED?

Omnilux Revive can be administered as a single treatment or in a course of between three and nine treatments. Therapists will assess your skin's response to the initial treatment and advise on required future treatments accordingly. A course of nine is recommended for those concerned with fine lines, wrinkles and uneven skin tone. There is no recovery time needed after an Omnilux Revive treatment.

#### WHERE CAN I BOOK AN OMNILUX REVIVE PHOTO-FACIAL?

For your nearest participating salon or for further information call 1800 808 993. Omnilux Revive is distributed in Australia and New Zealand by Doctors Formula.
